# CovHack2020 Judging Guide

This guide has been created to help make judging more consistent for CovHack2020. These sheets will remain entirely private, and the judges are encouraged to avoid putting identifiable information on this document. These guides will not form the final decisions for ranking projects, but assist the judging panel in making their decisions.

| | |
|---|---|
| Team Name | |
| Project Name | |
| Total Points | |

Each section is worth 5 points, with an overall maximum of 15. Assessment is of the team as a whole. Assess each project individually and not in comparison to other projects, and try your best to be consistent over the course of the demos. Awarding zero or maximum points is ok if you feel that is an accurate and reasonable score! Points do not have to be awarded specifically in line with the description provided, as long as the underlined criteria is met. **Please ask questions at the end of the demo if you believe it could increase their number of points!**

| Section | Description | Points |
|---|---|---|
| Learn (Challenge) | <ul><li>_Learned something new_</li><li>Used a range of technologies together</li><li>Project is unique</li><li>Identified issues during project</li></ul> | /5 |
| Build (Technical) | <ul><li>_Uses technologies in unintended or interesting ways_</li><li>Project does something</li><li>Project works as intended</li><li>Resolved issues during project</li><li>Project is technically complex</li></ul> | /5 |
| Share (Social) | <ul><li>_Explained how they resolved issues in project_</li><li>Provide documentation for their project (Devpost counts!)</li><li>Had help from others with their project</li><li>Helped another team with their project</li></ul> | /5 |
